

Problem-Solution Fit

Date	4 July 2026
Team ID	xxxxxx
Project Name	OptiCrop: Smart Agricultural Production Optimization Engine
Maximum Marks	5 Marks

Problem-Solution Fit Canvas:

The Problem-Solution Fit Canvas identifies the target users, their challenges, limitations, and current solutions while demonstrating how the OptiCrop Smart Agricultural Production Optimization System provides an AI-based crop recommendation solution to improve agricultural productivity and decision-making.

1. Customer Segment(s) (CS)	Farmers, Agricultural Researchers, Agribusiness Companies
2. Problems / Pains (PR)	Poor crop selection, low yield, unpredictable weather, inefficient use of fertilizers
3. Triggers to Act (TR)	Need for higher profits, changing climate, crop failure, demand for better productivity

4. Emotions Before / After (EM)	Before: Worried, uncertain, stressed. After: Confident, satisfied, hopeful
5. Available Solutions (AS)	Traditional farming advice, agricultural experts, weather apps. Pros: Easy access. Cons: Less accurate, time-consuming
6. Customer Limitations (CL)	Limited budget, lack of technology, poor internet access, limited knowledge of AI
7. Behavior (BE)	Farmers rely on experience and local advice for crop selection
8. Channels of Behavior (CH)	Online: Website, Mobile App. Offline: Agricultural offices, Local experts
9. Problem Root Cause (RC)	Lack of accurate data analysis and scientific crop recommendation
10. Your Solution (SL)	AI-based crop recommendation system using soil and climate data to suggest the best crop
