Data Flow Diagram

The Data Flow Diagram (DFD) illustrates how data moves through the OptiCrop Smart Agricultural Production Optimization System. It shows the flow of soil and environmental data from the user to the machine learning model, which processes the input and generates crop recommendations. The DFD helps in understanding the system's data processing, storage, and interaction between different components in a simple and structured manner.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	Represents an external user or system that sends or receives data (e.g., Farmer).
Rectangle with numbered header	Process	Represents a process that transforms input into output (e.g., Crop Prediction).
Rectangle (solid fill, no number)	Data Store	Stores information such as user data, soil data, and prediction results.
Labeled arrow	Data Flow	Shows the movement of data between entities, processes, and data stores.

Example

The diagram below illustrates how the symbols above come together to form a complete data flow diagram
